

We are indeed, indebted to many sources for information and pictures which give us a reading and visual understanding of early history of our communities.

As to the arrival of the Iron Horse on rails into Timpanogos Valley; The First Denver & Rio Grande Western rolled into Heber City, on the 29 Sep 1899 on a branch line from Provo and up Provo Canyon, at the first Heber rail station. Many people were there to greet it, and a great celebration ensued. This occasion is well-described in HBUM, pp150-153.
